MovieMelt – Online Movie Store Interface

Project Overview

MovieMelt is a responsive movie store interface designed to display movies in a structured product layout. The project focuses on building an e-commerce style interface with product listings, individual product pages, and a clean visual layout. The goal of the project was to practice layout structure, responsive design, and user interface development.

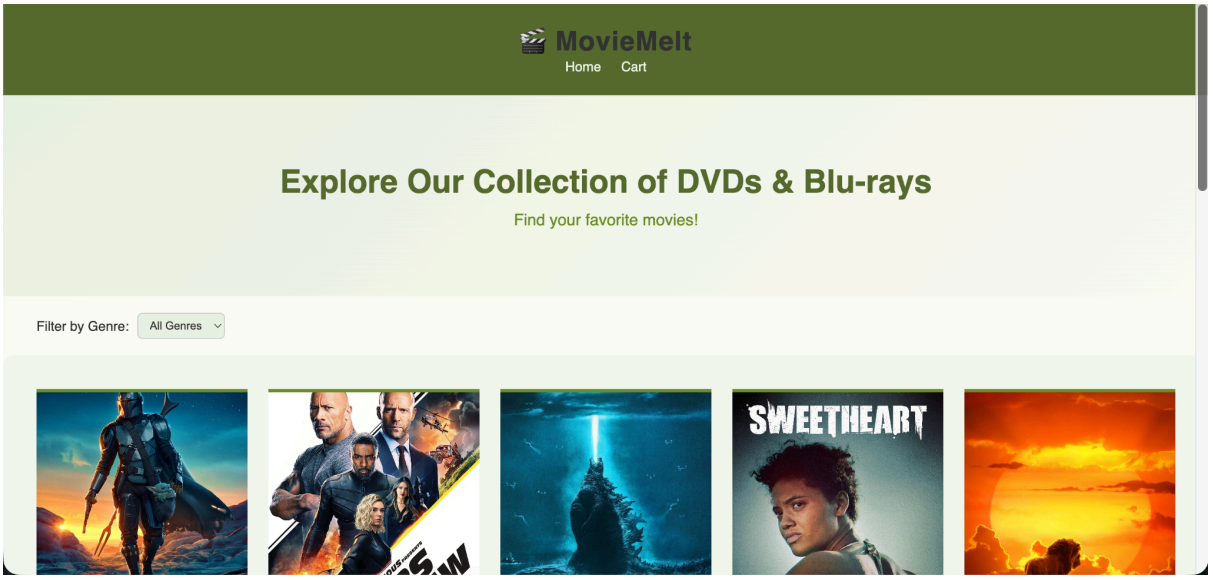
Technologies Used

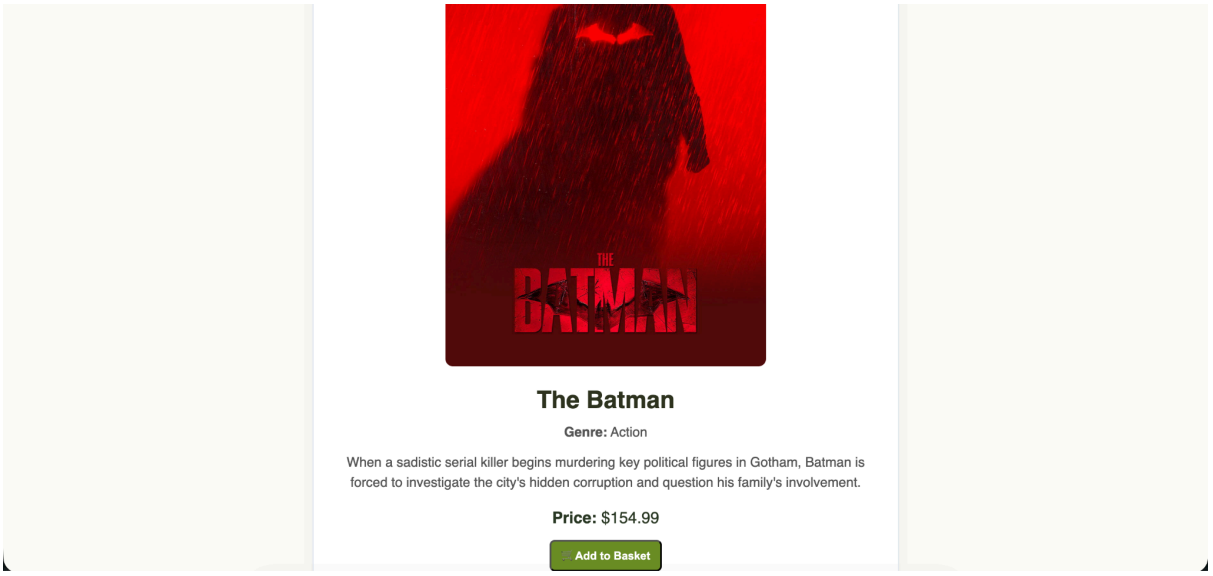
HTML
CSS
JavaScript
Responsive design
GitHub Pages

Features

Movie product listing page
Individual movie product pages
Responsive layout for desktop and mobile
Navigation and structured UI layout
Movie images, descriptions, and pricing

Screenshots





THE
BATMAN
The Batman
Genre: Action
When a sadistic serial killer begins murdering key political figures in Gotham, Batman is forced to investigate the city's hidden corruption and question his family's involvement.
Price: $154.99

Challenges

One challenge during this project was structuring the layout so that movie cards remained consistent across different screen sizes. Adjusting the grid layout and spacing required several iterations to ensure the interface remained visually balanced. Also getting all the images to appear on the home page.

Future Improvements

Add shopping cart functionality
Add movie search and filtering
Implement user accounts
Add backend functionality for real product data
